

## Purpose:

To build a hybrid calculator app mainly for android users. (but also available for IOS)

## UI:

## Function:

- Combo calculation
- Cross platform (IOS and Android)

## Code scaffold:

JQuery.js- JavaScript of JQuery Mobile.

Reset.css- set user interface for the background.

Main.css- set user interface of the calculator.

Calculator.js - coded with the function of all the calculation.

Index.html - the index page of the app.

Config.xml - the required file for Phonegap to convert the web document to a hybrid app package.
